

WHY CHOOSE DANEPLAST FOR YOUR NEXT PROJECT

If you are looking for one of the following:

- An injection moulding company to take on your next project
- A specialist to advise you on production techniques to assist your product designs
- Help with prototyping your next product
- Someone to design and produce your tooling in the most cost- effective way

Read on to find out why you should use us!

1. QUALITY

Our in-house quality system gives you total piece of mind that your mouldings and assemblies will be produced to the highest standards.

2. SERVICE

We have built our business on exceptional customer service over the last 21 years. We are able to operate a 24 hour, 7 days a week shift pattern to meet our customers requirements. Whatever we commit to do, you can rely on Daneplast to deliver.

3. EXPERIENCE

Throughout our 21 years of trading, we have slowly built Daneplast up to be the company it is today. The strong foundations that are in place and the expertise and experience of our staff means our customers can feel confident in our ability to offer sound advice and deliver quality goods at competitive prices.

4. VERSATILITY

We have injection moulding machines ranging from 50 – 1000 tonnes. We have our own in-house toolroom and we are able to provide a full tooling service from design to manufacture. We also offer heat bending, acrylic fabrication and hot foil blocking.
